-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-3, 14-16 are rejected under 35 U.S.C. 102(e) as being anticipated by Moroney et al PN 6,711,684.

In regards to claims 1, 14: Moroney et al teaches a processor (100 or 500) operable to perform a plurality of functions, said processor comprising: an input port (Download port, EJTAG interface); a storage element (112) operable to receive and to store an input signal (download) input via said input port, said input signal comprising at least one control value (code); control logic operable to control (104, 504) at least one of said functions of said processor in dependence on said at least one control value (code); and access logic (124) operable to receive an access control signal (correct security code/ or alternatively the signal that

Art Unit: 2112

blows the fuse) and to disable access via said input port to said at least one control value stored in said storage element in dependence upon said access control signal (the security code being incorrect thus causing the fuse to be blown).

In regards to claims 2, 15: Moroney et al teaches the access being disables including a write access.

In regards to claims 3, 16: Moroney et al teaches the access control signal is non-reversibly (blown fuse) set to a value such that access to via said port is permanently disabled.

Allowable Subject Matter

3. Claims 4-13, 17-23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

PN 6,240,493 to Hardwood, III et al teaches all the limitations of claims 1 and 2.
